

## Other Zoonoses in Humans 2017

### **Trichinosis (Trichinellosis)**

No cases of trichinosis were notified in Ireland for 2017.

### **Yersiniosis**

In 2017, 6 cases of yersiniosis were notified giving a crude incidence rate of 0.1 per 100,000 population. This was an increase compared to the 3 cases reported in 2016. The reported incidence of yersiniosis in Ireland is low relative to the EU as a whole, and to Northern Europe in particular. Twenty-six member states in the EU reported 6,823 confirmed cases of yersiniosis in 2017. The EU notification rate was 1.77 cases per 100,000 population which was 2.8% lower than in 2016. This was the lowest EU notification rate in five years.

### **Q Fever**

2 cases of Q fever were reported in Ireland in 2017.

### **Echinococcosis**

No cases of echinococcosis notified in 2017.
